

TRP EXHAUST CLAMPS

Maximize your exhaust system by using TRP Exhaust Clamps. All clamps have been tested to ensure high quality and to maximize performance. TRP Exhaust Clamps come with pre-attached hardware including force bars and nuts. They are designed with a stepped band for lap joints, providing fast and accurate installation with a stronger seal.

The TRP Exhaust Clamp program offers multiple clamp variations including wide band pre-formed, U-clamps, Vband and more.

TYPES OF CLAMPS

Wide Band

Designed to stop leaky gaps between overlapping exhaust joints.

- » Available in flatband and pre-formed style
- » Made from stainless or aluminized steel
- » Made in varying diameters from 2.5" to 6"
- » Some clamps available with gaskets

Heavy Duty

- » Available in flatband style with a 3/8" U-Bolt
- » Made from Chrome or Zinc
- » Made in varying diameters from 2" to 6"

Guillotine

- » Available with a 360-degree seal style
- » Made from Zinc
- » Made in varying diameters from 3" to 6"

V-Band

Designed to withstand the high temperatures of engine/turbo exhaust.

- » Used to connect exhaust pipe flange to turbo or engine manifold
- » Made from stainless steel
- » Made in varying diameters from 3.5" to 5"

Welded Saddle

- » Available in extra-long U-bolt style for use with brackets, with a 3/8" U-Bolt
- » Made from Zinc
- » Made in varying from 4" to 5"

U-Bolt

- » Available with two threaded ends that allow for attachment to a bracket or other component
- » Made from Zinc or Chrome
- » Made in vary diameters from 4" to 5"
